

Design and Implement your Future Success

Doctor Mastership Certification Dental Hygiene Mastership Certification

The JP Institute invites you to Design and Implement your Future Strategies for Practice Success with our Mastership Certification Curriculum!

The Mastership Certification for Doctor Leadership and Dental Hygiene Mastership Certification is Co-Presented by the 26 year Advanced Continuing Education firm, The JP Institute *and* Award Winning National Lecturer, and Highly Successful Private Practitioner, Dr. Larry Emmott.

Ask us about our exciting Educational Grant Scholarship opportunity. You can apply for Educational Grant Scholarship opportunities and receive up to \$1,500 courtesy towards The JP Institute Mastership Certification Curriculum.

OraPharma, the parent company of Arestin has joined alliance with The JP Institute to ensure that dental offices have an opportunity to receive the most advanced hands-on training available for practice success. Selected dental offices will receive Educational Grants to doctors and dental team for The JP Institute's Mastership Certification Curriculum.* The Mastership Certification Curriculum is offered in strategic locations throughout the United States. *The JP Institute is an ADA and AGD Continuing Education Recognition providers.*

The JP Consultant's Institute Mastership Certification Curriculum will give you the insight and implementation strategies of the most successful doctors and dental team within their 26 years of teaching and working hands on with over 2,000 offices. The JP Institute is renowned for developing clinical and management training curriculum that teams can embrace and integrate easily within their dental offices.

Dr. Larry Emmott shares his recipe for practice success through his own 28 years of Private Practice and Leadership Skills, Technology Integration, Practice Management and Practice Branding. Dr. Emmott is the leading dental high technology authority in the country, speaking to hundreds of professional groups and featured keynote at *every* ADA Technology Day, as well as Technology Columnist for 'Dental Products Report.'

The Doctor Leader Mastership Certification curriculum is held at the same time as the Hygiene Mastership Certification curriculum. The courses are blended with an emphasis on philosophical, clinical and management system refinements. The training is science evidence based centering on optimum comprehensive care. Therefore our curriculum includes how to best support the patient's restorative/aesthetic and periodontal needs.

The Mastership Certification curriculum will take you through the steps of defining what is the future vision of your dental practice and define the technology, clinical, management systems, ergonomics, mentoring styles and resources that are appropriate to accomplish your vision. Next, we train the steps to integrate *your* action plan and accomplish the practice of your future !

The Mastership Certification training will give the dental practice an immediate increase in practice production. This is accomplished by training in a hands-on clinical operatory setting. The mentoring session begins by refining the team's support of their pre-diagnostic skills merged with the advanced communication skills to increase case acceptance. The doctor and their clinical team then participate together in a structured clinical mentoring session that produces incredible results.

Each practice will leave the first session with written goals and a concrete action plan for direct implementation of each department for leadership, philosophical and clinical refinements, technology and product, and optimum management and accountability. The course work between the first and second session is designed to ensure in-office implementation. The second session will review the integration, find out what challenges occurred and what objectives need to be altered to further advance the in-office implementation. A faculty member of The JP Institute will work with each dental team member to ensure the proficiency of the didactic seminar portion followed by hands-on proficiency at the operatory chair. Of course fun and celebration is an important part of the course as well!

(Due to the hands on coaching and customization of working with each doctor, there is a limit to 20 doctors and 30 hygienists per class)

The level of practice success is measured by the level of passion and excitement of a committed team. Join us for this dynamic Doctor Leader Mastership Program merged with the Hygiene Mastership Certification Program. Empower your team to choose to win for Comprehensive Patient Care and Amazing Practice Success!

* Please call The JP Institute at 1-800-946-4944 to review the criteria to be awarded the Education Grant Scholarship opportunities.
